## Monthly Air Pollution Control Program Detail Report

### Concerns Investigated Between September 16, 2021 and October 15, 2021

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegation as it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
Concern No.	47113	Concern Info	Location is in the village of Turney Missouri 64493. Wade Farms owns and operates a grain elevator in a residential neighborhood!! This is an outrage!! May not be zoned for this kind of enterprise. My wife suffers from asthma and I can do nothing to prevent this from happening. (Please evaluate photos that do not express the full gravity of the situation our community is faced with.) My house, cars and clothes are covered with corn or soy bean debris. An emergency in my eyes speaking for the health of my wife. Thank you for all you do.?					
Comments	No particulate matter was observed during the investigation.							
KCRO	9/20/2021	9/20/2021	City of Cameron	Cameron Clinton	Asbestos	MC		
Concern No.	47273	Concern Info	To Whom it may Concern:  I am writing today because I have a concern for me and my kids' health and safety and others in the City of Cameron. I wa talking to my neighbor the other day and they told me that the city was going to destroy some houses, and that it looks so much better when they are gone. I asked them what was done with all the asbestos in the houses they destroy. I was told that they didn't worry about it they just smash the houses and haul them off. Being from California I know asbestos is very harmful. Again I am concerned about me and my kids' safety.  Thank you for your time looking into this.					
Comments	This project appears exempt from asbestos regulations.?							
KCRO	9/24/2021	9/20/2021	Charlie's Tree Trimming and Removal, Inc.	St. Joseph Buchanan	Open Burning	DS		

## Monthly Air Pollution Control Program Detail Report

### Concerns Investigated Between September 16, 2021 and October 15, 2021

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
<b>Concern No.</b> 47276 <b>Concern Info</b> South Central Buchanan County Fire Department reports responding to a fire at Charlie's Tree Trimming & Removal after midnight. Field notes were emailed to KCRO.								
<b>Comments</b> Charles Owens operates a vegetative waste collection operation. Open burning occurred within 200 yards of a neighboring structure without obtaining waiver from the owner/occupant. Additionally, open burning occurred outside of the allowable time of sunrise to sunset. Owens will be receiving a Lett of Unsatisfactory Findings.?								
KCRO	9/24/2021	9/21/2021	Neal's Quality Tree Service LLC	Corder Lafayette	Open Burning	CK		
<b>Concern No.</b> 47278 <b>Concern Info</b> Since June 1, 2021, we have noticed that Michael Neal is cutting trees down from jobs and brings the trees/brush back to property and burns them, which is located within the city limits of Corder. The smoke from the burn pile always covers Mrs. Jensen's home (660-394-2679), who has several medical issues and uses oxygen.								
<b>Comments</b> Michael Neal was found to be out of compliance with the Missouri Air Conservation Law and its implementing regulations based upon observations made during the investigation. Open burning of vegetative waste at a collection center occurred within 200 yards of structures not owned or controlled by the party conducting the burning. Neal appears to have returned to compliance; therefore, he will be issued an Unsatisfactory Findings for the open burning violations.								
KCRO	9/23/2021	9/22/2021	Worldwide Steel	Peculiar Cass	Permitting Odor Stormwater Contamination	DS		
<b>Concern No.</b> 47298 <b>Concern Info</b> Caller is concerned because she and her neighbors can smell chemical fumes from the steel factory in the neighborhood. They paint, and there do not appear to be any controls on the facility. Worried the fumes are affecting their health.								
<b>Comments</b> No violations were found during the investigation.

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
KCRO	9/27/2021	9/27/2021	Everhart Tree Service	Kansas City Jackson	Open Burning	MC		
<b>Concern No.</b> 47470 <b>Concern Info</b> Caller reported a fire at a tree service's dump that was started around 15:00 hours on 9/24/21. The caller reported the dump was primarily tree trunks, limbs, and mulch. The caller stated that the only thing they could see that wasn't natural in the dump was some old carpet and that the dump was approximately four to five acres in size. The caller was concerned with the amount of smoke coming off the fire but the smoke was not black in color. EER staff referred this to the regional office.								
<b>Comments</b> This concern is located within the city limits of Kansas City, MO; therefore, the concern was referred to the delegated local agency, which is the City of Kansas City Health Department's Air Quality Program.								
KCRO	9/29/2021	9/29/2021	Tim Smith	Lone Jack Jackson	Open Burning Open Dumps	JS		
<b>Concern No.</b> 47465 <b>Concern Info</b> Sni Valley Fire Protection District reported a huge dump that caught on fire yesterday afternoon, and they were still trying to put it out today. They said the people on site were burning brush, without a burn permit, and were not supervising the pile, and it caught the nearby trash heap on fire. The owner of the property had been collecting junk for years but recently died and the people who inherited the property were trying to clean it up to sell.								
<b>Comments</b> ?A Letter of Warning has been issued to Tim Smith for burning of prohibited items and improper disposal of waste.

### Concerns Investigated Between September 16, 2021 and October 15, 2021

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations as it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
<b>Concern No. 47471</b>								
<b>Concern Info</b> Dense acrid smoke and ash from a "controlled" fire that was intentionally set by private party on Friday 9/24/21 and still invading our densely populated residential neighborhood and others nearby as of Monday 9/27/21 7:50pm, smoke carried prevailing winds. Horrible stench, irritates nose and throat, causes eye irritation. Reported situation to Kansas City MO Fire Dept. They say the situation is being "monitored" but since no structures are directly threatened, it is up to property owner to extinguish smoldering fire. Help!								
<b>Comments</b> Grandview Fire Department contacted the Department about this issue. I contacted Assistant Chief Stark for more information. The fire is located at the border of Kansas City and Grandview and is inside Kansas City city limits. Stark reports that the fire was intentionally set, but they cannot determine who set the fire; the land owner, Tony, claims the fire was started by homeless in the area. The site has had years of accumulation of vegetative waste from the tree trimming service operated from this site, which is now smoldering and causing large quantities of smoke in the area. The fire department concerned that instead of putting out the fire, the land owner is adding to the fire to get rid of the remaining waste.								
After some internet searching, I determined Tony was Tony Everhart and the tree trimming service was Everhart Tree Service. Since the site is within Kansas City, I referred the matter to Kansas City Air Quality (KCAQ).								
See SharePoint for more info.

--------	-----------------------	------------------	------------------------------------	-------------	-----------------	-----------------------	-----	------

**Concern No.** 47408    **Concern Info** SP:30700  
?CP states the Timber Ridge landfill odor is very strong this morning. CP state their nose is burning.

**Comments** I investigated the concern on September 21, 2021. Prevailing winds were from the NNW at ~10 mph.

I approached by heading north on Hwy 47. Odor was checked for at the intersection of Hwy. 47 and H. No odor detected. I then continued up Hwy 47 Yellow Dog Rd. Along Hwy 47 livestock odors were detected. I turned west down Yellow Dog Road and approximately 0.6 of a mi. down the road the smell of chicken manure was detected. I continued the circuit to highway 30 then across to Hwy. Y. I took Highway Y south and took a right onto Hwy ww. Odors were detected at the intersections of Hwy WW and Thuder Ridge Rd. and Highway WW and Still Creek Pass. Odor analysis via Nasal Ranger did not indicate an odor violation. Continued south on Hwy WW to Highway H. Continued west on Highway H. A clear landfill odor was detected south of the landfill at the intersection of Highway H and Stocking Farm Estate Dr. and just across Hwy H from the Landfill directly south of the scale house. Odor analysis via Nasal Ranger did not indicate an odor violation. ?I then continued west to Highway 47.

Spoke to Kevin Gentry on September 22, 2021. He knew of no issues at the landfill at the time mentioned in the concern.

### Concerns Investigated Between September 16, 2021 and October 15, 2021

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations as it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
Concern No.	47668	Concern Info	SP:30810 ?The caller contacted the EER Spill line to report a fire that he believed was set intentionally. The caller stated that he has had at least 15 complaints called in on this saw mill in the past year and stated he was out at this location about six months ago for the same reason. The caller stated that the fire was primarily saw dust, but he could see five to six tires, about a square of shingles, approximately one half a dump truck load of asphalt, approximately three dump truck loads of construction debris, and a couple small propane tanks that had already exploded. The duty officer referred this incident to 1 regional office. ?					
Comments	At the time of this investigation, the sawmill's sawdust pile was once again on fire. It is believed that the this underground sawdust fire was initially accidentally set. It has not been possible to ascertain if the fire has ever gone completely out.  During the investigation, I was told by Jessica Tune of JT Forest Products that the fire had not gone completely out. Jessica Tune stated that water or water and Dawn dish washing soap have been applied at times to try to help control the fire. Justin Tune showed us an area on the hillside where an employee had dumped some waste from a residential garage fire. It did not appear that this fire debris had been burned during this recent fire event.  I did not observe evidence of fire other than on the hillside where the existing sawdust pile was burning again along with some wood waste stored on surface of the top of the hill to the north side along US Highway 60 .

**Concern No.** 47666    **Concern Info** SP:30866

??The caller reports an unknown chemical smell like rubber is being released from Buckman Laboratories.

**Comments** At the time of my investigation, no odors were noted. I was in the area from 12:08 p.m. to 1:38 p.m. The wind was from the NNW at 6 miles per hour, was sunny, and the temperature was 77 degrees Fahrenheit. I did not note an odor of the type described in this concern. I did observe odors in the air checked such as wood smoke, mowed grass, and vehicle exhausts during my investigation. I drove State Route E both north and south from Cadet. I also tried to find odors by driving west along Wicket Road and west along Midwest Road to Mineral Point.

Below is an excerpt from an e-mail from Rocky Stevens with Buckman Laboratories summarizing events of September 27, 2021.

Please see the attached form for complaint investigation. As I mentioned we encourage community members to contact us directly but unfortunately that doesn't always happen. In this case a retired employee Rick Knight heard the dispatch notification through his scanner and contacted Chris Mosi (evening shift Plant Operator). Chris investigated and timeline for activities as he documented are as follows:

?Timeline

18:27- Rick Knight (Retired Buckman Employee) called

18:30- Reviewed DCS processes

18:35- Circled facility to survey for odors (none found)

18:45- Notified G. Rainbolt (Plant Production Manager) of findings

19:00- Talked with Local Fire Department (informed that there were no issues present causing odors)

19:05- Local Fire Dept. left facility

SERO	10/6/2021	9/30/2021	Perryville Industrial Park	Perryville Perry	Odor	TR		

**Concern No.** 47669 **Concern Info** SP:30846

?CP states there is a musty odor coming from the industrial park area. CP states it seems strongest at the hwy 51 and hwy 61 intersection.

**Comments** At the time of the investigation, the odor described by the concerned party was not found. I was in the area from 11:06 a.m. to 12:18 p.m. Potentially odor causing activities that were noted included odors from the resurfacing of Highway 61, brush hogging of a corn field, working on natural gas lines the Perryville Industrial Park, and construction work on an office building at the Bank of Missouri.

I parked my vehicle temporarily in the parking lots at the Dollar General and the Rhodes 101 gas station near the intersection of Highway 51 and Highway 61. The driving route I chose included driving Walters Lane, Corporation Lane, Highway 61, Highway 51, North Main Street, PCR 900, State Highway V, and State Highway AC. This allowed me to drive around the three permitted air pollution sources in the Perryville Industrial Park. These are T-N-T Plastics, Inc.; Atas Molded Plastics; and TG Missouri Corporation.

Since the source of this odor was not named by the Concerned Party, contact with a representative for each of these three permitted facilities was made. I reminded each of the three contacts that there is a state odor regulation and I asked if there had been any upset condition around the September 30, 2021, timeframe when this odor was reported. Bryon McClure stated that there had been no upset or otherwise unusual condition at T-N-T Plastics. DeOnna Dunivan stated that nothing unusual was taking place during this timeframe at Atlas Molded Plastics. Dylan Carpenter stated that there was no malfunction or upset condition at TG Missouri Corporation that might have caused this odor.

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
<p><b>Concern No.</b> 47616    <b>Concern Info</b> SP:</p> <p>I received a call from a Ms./Mrs. Kimberly Davis on October 5 regarding an open burning concern. She says that a woman coming on to her deceased father's property to burn tires. She, herself, has not witnessed anything, but has had several neighbors around the property tell her they've seen the same woman coming onto the property to burn tires. Some names the witnesses she gave were Jim Ellison, Heather Glick, Bobby Penrod (retired law enforcement), Willy Graham, Amy Bryant, and Sheila Belle. This property used to be a junkyard according to Kimberly, but is now mostly overgrown with tree. The address of the property is 29 West Crowder Street in Sikeston. Kimberly's phone number is (573) 703-6791.?</p> <p><b>Comments</b> ?I arrived at 29 W Crowder St. around 2:30 PM and immediately saw a large clearing with debris scattered about and what looked like charred earth from several burnings. Mrs. Davis arrived not long after so I presented my credentials and she showed around the perimeter of the property. I noticed several other spots where various items, as well as tires had been burned. I asked Mrs. Davis for permission to take photos of the property and she consented. After I took some photos, we went and spoke with Mr. Jim Ellison and after that, Mr. and Mrs. Travis Glick. Both Mr. Ellison and Mr. and Mrs. Glick informed me that an individual by the name of Krissy Henson was the one burning the tires. Everyone that I spoke to gave me the same information. They said that Mrs. Henson picks up several tires fairly often from a tire shop/service center on Highway 114 near a flea market, although they couldn't give me a name. She then hauls them back to Crowder. Mr. Ellison has not witnessed Mrs. Henson burning the tires, but Mr. Glick has. This has apparently been going on for several years now and local law enforcement and the fire department have been involved according to the individuals I spoke with. I gave my business card to both Mr. Ellison and Mr. Glick and told them to contact me if they had any additional information or if they had any questions or concerns.</p>

<b>Concern No.</b> 47667 <b>Concern Info</b> SP:30969 ?Brian Conley of Conley's Quick Shop in Pomona is burning his trash and the embers are blowing over the CP's service station where people are buying gas. CP states he burns right next to his business and its a wonder he doesnt burn his place down.								
<b>Comments</b> At the time of the investigation, no open burning was observed. I spoke with Brian Conley and I explained that the open burning of trade wastes for disposal is prohibited (except for untreated wood wastes). Brian Conley stated that he was unaware of the open burning regulation. At the time of our discussion inside the business, I overheard Brian Conley instructing the staff of Conley's Quik Stop and Deli to cease the open burning of boxes and other cardboard and to instead break down the boxes and place the boxes and other cardboard in the dumpster, which I noted on site prior to talking with Brian Conley. I gave Brian Conley my card a copy of the fact sheet Facts on Open Burning Under Missouri Regulations and a copy of the regulati Missouri Air Conservation Regulation 10 Code of State Regulations 10-6.045 Open Burning Requirements?. Brian Conley was cooperative with my investigation; but was not pleased to be the subject of the investigation.

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
Comments	<p>August 31, 2021 at approximately 2:40 pm, I called the concerned party and spoke with Mr. Bill Calahan, who owns the property next to Animal Care Service. He mentioned that Animal Care Service's incinerator stacks are constantly emitting smoke with a dark opacity from approximately 3-5 pm Monday through Friday and that the odor is such that they have to wear a mask on their property. The odor dissipates for a few days after rainfall and then comes back just as strong. I mentioned that incinerators usually burn pretty cleanly, so if he is noticing visible emissions, then there may be an issue with the operation of the incinerators. I scheduled a time with Mr. Calahan for me to visit their property Tuesday September 7, 2021 at 3:00 pm so that I can observe the stack opacity and possibly conduct nasal ranger readings. He mentioned having to take care of his daughter around 4:00 pm. I asked for permission to enter or stay on his property (outside) without his being there to which he agreed. Mr. Calahan also mentioned that Animal Care Service is operating in a residential zone. I recommended that he speak with the Planning and Zoning Department with Jefferson County and he replied that he already did. After this discussion, the investigation date was pushed back to September 10, 2021 due to the concerned party having a family emergency and wanting to be present while I investigated the concern.</p> <p>September 10, 2021, at approximately 3:00 pm, I met with the concerned party at their house. I parked within their driveway and then requested that they show me the best spot to observe the stacks from beyond the Animal Care Service boundary. Mr. Danny Callahan led me to a break in the tree line where the concerned party leaves their trash bins for removal, approximately 575 feet northwest of the Animal Care Service building and near where Challenger Drive intersects with the railroad crossing (see attachment). At the time of the observation, the temperature was 88 degrees Fahrenheit, 38 humidity, Wind Direction: S, Wind Speed: 14 mph. I observed the stacks for approximately ten minutes, but only observed heat waves from the stacks. It is notable to mention that the distance of the observation point made it difficult to discern the opacity, so I asked Mr. Callahan whether there was a spot closer to the facility from where I could observe. Mr. Callahan then led me 500 feet south of the initial observation point and directly to the east of the animal care service building. From there, I chose a stack a random stack and conducted a Method 9 observation, taking readings every fifteen seconds for six minutes. The readings averaged 0-5% opacity.</p> <p>I then informed Mr. Callahan that I would conduct a site visit and left.</p> <p>September 17, 2021, I visited Animal Care Service at approximately 3:00 pm. During the visit, I observed no exceedances of opacity, though it is notable to mention that many of the incinerators onsite were either on cooldown mode or were shutdown. During the site visit, Mr. Tom Foy (the son) mentioned that the incinerators were switched from propane to natural gas very recently (approximately four months ago). I asked regarding the disposal of the ash and Mr. Foy responded that they dispose of the ash through their waste management service (dumpster), though an employee of the facility mentioned they may possibly be disposing of the ash within a pit on the property. At the time of the visit, I could not confirm the validity of either response regarding the ash disposal.</p>

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
Comments	<p>??I visited the site on 9/24/21. I did not observe any open burning at the time of the investigation. I observed a small burn pile on the front lawn, that appeared to have only tree trimmings/brush. I observed the property from Laurel Oak Ln, but could not see the property past the fence and trees. I observed the property from Hammer Ave, and saw trash in the backyard, but I did not observe any burn piles. I approached the house and knocked on the door. A man named Chaz answered. He explained that he did not own the house and had been staying there only a month or so. I asked him what was burned on the property and he said only brush/firewood. I asked if he was aware of any tree trimming/landscape services dropping off wood to burn and he said he knew for a fact that never happened. I asked if I could have access to the property and take photos. He said that he could not give me permission since he was not the property owner. I gave him a fact sheet on Open Burning and my contact information, and told him to pass it along to the owner and have them call me.</p> <p>I spoke with David and Sherry Ginnett and told them what I found. They said Chaz was lying, and that they frequently burned trash and had deliveries of tree trimmings dropped off. I asked them to send any photos. I received around 20 photos from them. The photos showed burning, but I could not tell what was being burned in any of the photos. I explained that the homeowners were allowed to burn household trash (non-durable) and untreated wood/vegetative waste that originated from their property. I explained that we would need proof that the vegetative waste was brought in from another property in order to cite them for a violation.</p> <p>On 10/1/21, I received an urgent voicemail while in the field from David Ginnett that open burning was taking place, and heavy fumes were impacting the trailer park. I called Mr. Ginnett about 30 minutes after he left the message. I asked if the fire was still burning and if the fire department had responded. Mr. Ginnett told me that the people burning must have a police scanner, because as soon as he called the fire department, they put the fire out. He said that by the time the fire department arrived at the property, the only thing in the burn pile was a 2 by 4. I explained again what we would need to prove in order to cite a violation. Mr. Ginnett told me that he had a photo of a tree trimming truck leaving the property, but none that showed them delivering burn material. I told him to give me a call next time this was happening, and to try to obtain photographic evidence.</p>

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
<b>Concern No.</b>	47581	<b>Concern Info</b>	Kevin Johnson lives at 8926 Berkay Ave, in Jennings, St. Louis County. He keeps noticing a strong anhydrous ammonia smell on a daily basis. He is very concerned that it is causing long term health problems for him and his dogs. He has brought this issue up with the police and local fire department on several occasions, and nothing has been done. He spoke with Fire Chief Stewart who put him in contact with the St. Louis County Air Pollution Control Program. He spoke with Kyle Ash about his concern, and has not received any follow up information. He tried visiting the St. Louis Dept. of Health and was told that Kyle Ash, and his supervisor Jeremy Rogus were both unavailable. He voiced to me that he feels like his concerns are going unheard because of the area of the county that he lives in.					
			Kevin thinks that the odor is coming from his neighbor, Keith Teague, across the street at 8927 Berkay, who works at PepsiCo. He said that he's seen his neighbor unloading anhydrous ammonia tanks from his vehicle and taking them inside. He is not sure what location his neighbor works at.

Comments	On 10/08 (Myron Lewis) received a call from Kevin Johnson reporting that he smelled the odor of anhydrous ammonia on his property. Mr. Johnson repeated the claim that a Mr. Keith Teague deliberately caused harm to him and his dogs by placing anhydrous ammonia on his property. Mr. Johnson again stated that St. Louis CO department of Health had not adequately investigated his concerns in the past. Mr. Johnson again stated that Chief Kevin Stewart of Kinloch Fire Protection District took readings at his home approximately 4 months prior to this call. I asked if he has talked to his neighbors and he said that his neighbors are either elderly or dead. When I informed Mr. Johnson that several investigations had been performed at his property St. Louis County Department of Health Air Pollution Control department and that nothing has ever been found he got angry and began to use profane language to describe the investigations. I told Mr. Johnson that if he used foul language I would hang up. I informed Mr. Johnson, in response to his last call, David Ruby left a voicemail with Pepsi Beverages Company to see if one of their employees could potentially be bringing ammonia tanks home as that we have not received a return call from Pepsi. I explained to Mr. Johnson that St. Louis County APCP, was the delegated authority for residential odor concerns for the Jennings MO area and that StL.CO has thoroughly investigated every possible lead and have not found evidence of any violative told Mr. Johnson that odor violations are subject to regulatory levels to be actionable and that none of the odors he reported were at actionable levels. suggested to Mr. Johnson if he suspected his neighbor is deliberately attempting to do harm to him and his dogs he should call local law enforcement St. Louis County Animal Care & Control. I further asked Mr. Johnson if his dogs could be the source of the odors. At this point he got extremely angry and called me "weak" The call lasted 1:08:38. Mr. Johnson asked for a record of this call and I informed him that he could request all records through sunshine request and gave him the number to the MODNR custodian of records. Mr. Johnson asked me to call the Jennings police department and relay the results that Chief Kevin Stewart reported to Dave Ruby. I told him if Jennings Police called SLRO inquiring about this concern I would speak them.							
	On 10/06 (Myron Lewis) received a call from Kevin Johnson. Mr. Johnson reported that he smelled the odor of anhydrous ammonia on his property. Mr. Johnson repeated a previous claim that Teague to deliberately cause harm to him and his dogs. I spoke to Mr. Johnson anhydrous ammonia is being deposited on his property by his neighbor Kieth son at length. Mr. Johnsons claims that St. Louis CO department of Health had not adequately investigated his concerns in the past. MrJohnson mentioned that Cheif Kevin Stewart of Kinloch Fire Department took readings at his home approximately 4 months prior to this call. He stated that he has talked to his neighbors and they have not reported smelling the same or similar odors. I informed Mr. Johnson that several investigations had been performed at his property by St. Louis County Deepartment of Health Air Pollution Control department and that nothir has ever been found. I informed Mr. Johnson, in response to his last call, David Ruby left a voicemail with Pepsi Beverages Company to see if one of

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
<p><b>Concern No.</b> 47547    <b>Concern Info</b> Hermann Wurst Haus is alleged to be smoking meat front of the building and the smoke coming from the smoker is entering the business at 230 East 1st street. This smoke is irritating to the owner of business and to customers of the business.</p> <p><b>Comments</b> I called Diane on 10/6/21. I explained that as a food service establishment, Hermann Wurst Haus is exempt from many of our state air quality regulations, including 10 CSR 10-6.060 Construction Permits Required, 10 CSR 10-6.065 Operating Permits, and 10 CSR 10-6.220 Restriction of Emission of Visible Air Contaminants. However, this establishment is still subject to 10 CSR 10-6.165 Restriction of Emission of Odors, and that I could investigate the odor part of the concern. Diane explained that the smoke was really intense and that she believed it to be causing many health issues, including multiple skin cancers. I spoke with Diane about when the odor is strongest and determined that Friday around lunch would be a good time to evaluate the odor. ?</p> <p>I investigated the concern on 10/8/21. I was accompanied by Suzanne Lamb, Environmental Program Assistant. We arrived at the facility around noon observed the smoker outside in front of the restaurant, but it was not being operated at the time of the investigation. The odor was noticeable but not strong. We both took nasal reader readings and did not perceive the odor at a 1:7, 1:4, or 1:2 filtration ratio. There was no visible smoke coming from facility.</p> <p>I called Mike on 10/12/21 and explained our findings. Mike told me that he has had a negative relationship with his neighbor for years. He told me that purposefully smokes his meats in the evening and at night, and on days that he knows his neighbor's store is not open, to avoid issues. As a request, sent an e-mail to Mike that explained the concern, our findings, and provided links to the applicable regulations and fact sheet.</p> <p>I left a voicemail for Diane on 10/12/21, explaining my findings, but have not heard back.</p>

<b>Concern No. 47548</b> <b>Concern Info</b> Bommarito Collision - Ellisville (facility 189-1595) runs an automotive repair shop, which conducts automotive spray painting. A concerned citizen contacted the SLRO office due to the spray painting fumes and hazardous air pollutants that are allegedly moving beyond Bommarito Collision's premises. The citizen is worried about impacts to their children's health, which attend St. John's school. St. John's is located adjacent to Bommarito Collision. The main concern is the playground for the students which is located roughly 200 ft east of Bommarito Collision. The citizen is concerned about children breathing in hazardous air pollutants while on the playground and while walking through the parking lot before and after school. The citizen claims that the paint fumes are also noticeable when arriving in the school's parking lot.

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
<b>Concern No.</b> 47769 <b>Concern Info</b> Ms. Wood contacted the SLRO office regarding a complaint about 5G cellular radiation. She insisted that due to 5G towers there was particulate matter being released into the ambient air. She described that she could see little white crystal flakes on objects that were located outside. She also specified that a noticeable amount of particulate matter collects on the trees in and around the city of Pacific. After we conversed for a while, I found that there is a silica fracking company ( US Silica - Pacific) and a concrete company (Franklin County Concrete) that could be the cause of particulate matter release. However Ms. Wood was adamant that the 5G towers and satellites were the cause of the particulate matter.								
<b>Comments</b> On Friday, October 15th I investigated the concern of fugitive dust around the city of Pacific, MO. Upon arrival to the city, I drove around Ms. Wood's apartment complex and the surrounding streets. I did not notice any fugitive matter on any building, roads, or vegetation. After investigating the area near Ms. Wood's apartment complex, I drove into downtown Pacific. Within downtown I did not observe any fugitive matter or dust on any open surface. Lastly, I drove to U.S Silica and Franklin County Concrete, to determine if the facilities would be contributing to the fugitive matter. I observed that the facilities did not have any fugitive matter leaving the premises of origin.								
I contacted Ms. Wood and informed her of my findings. She insisted that there was still fugitive matter in the air, but that it would not be visible to the eye since it is from the 5G cellular towers. I told Ms. Wood that if she noticed the particulate matter again, and it was visible on outside surfaces, to contact the department again. I also provided her with St. Louis County Air Pollution Control's phone number as well.

Concern No.	47087	Concern Info	Dan Akin, Missouri Department of conservation, called on behalf of a concerend individual who wishes to remain anonymo This citizen has contacted EPA, but was told this would be handled on a state level.  Individual lives close to tablerock lake, on the water, states a neighbor is burning large amounts of copper wire at midnight every other night. Then stripps rubber coating off and buries remains of rubber coating off wire. Concerned about air quality due to large amounts of black smoke and runoff going into table rock lake.  Multiple concern parties have reported this to Akin and have videos of the burning.  The responsible party has been previously verbally noncompliant with MDC staff. Akin has offered to accompany the department when they visit. Akin has also stated he can get an exact address from the concern party, but did not have it at the time of the call.

<b>Concern No.</b> 47493 <b>Concern Info</b> Frank Doorn was burning again this morning.  <b>Comments</b> SharePoint #30904  Doorn is being issued a RNOV,								
SWRO	10/8/2021	10/7/2021	Norma Figueroa	Newton	Open Dumps	CG		
<b>Concern No.</b> 47501 <b>Concern Info</b> This is a follow up to concern #28851 from 3/30/2021. The same construction contractor as before has been dumping their construction waste on the same burn pile as last time. The main pile is toward the back of the property and includes OSB among other construction waste. Someone familiar with the site said they planned to burn the pile this weekend. The caller noted they did not see Revolution Tree Service this time; just the same construction contractor as last time.  <b>Comments</b> See Sharepoint 30917  No violation								
SWRO		10/7/2021	Chris Bick	Newton	Open Burning Asbestos	CG		
<b>Concern No.</b> 47511 <b>Concern Info</b> Old Fairview School. The gentleman is still removing and now burning at night some of the debris. The caller was told the gentleman received a letter a few months ago to cease due to the asbestos in the building. The caller stated he believed w had been out there before.  <b>Comments</b> SharePoint #30919

### Concerns Investigated Between September 16, 2021 and October 15, 2021

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations as it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
Concern No.	47554	Concern Info	Caller says there is horrible odor coming from the subdivision system. It's so bad he can't turn the air on or it comes in through their whole house. He say it's been about 2 years since he called in on them. Last time DNR came out he says they required them to do something with the system, because then it got much better. He says in 14 years he has called ir on them several times, and each time we come out and inspect it gets better. However, he says then it gradually starts getting worse. He's wanting to know if there's anything we can make them do so it doesn't keep happening. He would like someone to call him because he has questions about some of the things he's heard that can be done to keep the odor dov					
			He did say once when it started getting this bad, it started discharging into the lake. ?					
Comments	SharePoint #30991							
No violation.
